

# Asset and Inventory Management

## Track and Reuse Assets Easily

With Intereum's Asset and Inventory Management Program, we precisely inventory items and analyze them to eliminate obsolete inventory and reduce storage costs.

You have a significant investment in your assets and inventory, so when your product is stored, it needs protection and management. We can help you with receiving and inspection services—and all your storage needs. With Asset and Inventory Management (AIM), we give you the tools to avoid unnecessary purchases by viewing assets at single or multiple locations, reserving assets and holding inventory, creating standard or historical reports, and controlling inventory.

### Program Attributes

The AIM software inventory usage and capabilities include:

- Access information 24/7
- Multiple levels of security access
- Designed for multiple users, warehouse locations, and customer inventories
- SIF capable for inventory transactions
- Product reservation system
- Automatic update of pulled inventory
- National customer availability
- Robust search features
- Standard reports with detailed information
- Fully customizable report options
- Reservation and history reports
- Optional pictures of inventory standards

### Real Results

Intereum partners with a large medical tech company with multiple facilities in the Twin Cities area that relies on the performance of AIM to ensure proper re-utilization of furniture and equipment. Over the past year, we have stored \$2 million in assets and they've been able to re-utilize more than 50% of their assets in reconfigurations that combined new furniture with current assets. This created **\$600,000 in savings** by avoiding the expense of purchasing all new furniture.

Regular reporting and account support provide an indispensable service to help our clients make informed decisions on how to be most cost efficient with their projects.

Use our "Asset & Inventory Management (AIM)" system for controlled placement of your items.

It is estimated that an industry average of 12% of assets are ghost assets—items that are still on the book even though they are no longer there or in an unusable state.

### State-of-the-Art Facility and Service

Temperature Controlled  
LED Lighting  
32 Foot Clearance  
105,000 Square Feet  
Cross-Docking
